

Working Student (f/m/d) - AI Developer @ Signavio

Software-Design and Development

[Apply now »](#)

We help the world run better

At SAP, we keep it simple: you bring your best to us, and we'll bring out the best in you. We're builders touching over 20 industries and 80% of global commerce, and we need your unique talents to help shape what's next. The work is challenging – but it matters. You'll find a place where you can be yourself, prioritize your wellbeing, and truly belong. What's in it for you? Constant learning, skill growth, great benefits, and a team that wants you to grow and succeed.

What you'll do

You will be a valuable addition to the SAP Signavio AI team, supporting the Lead Joule Developer in advancement of SAP Signavio Joule and agents within.

This role sits at the crossroads of the multiple Signavio solutions and the central SAP AI Joule team. Working directly with our Lead Joule Developer at SAP Signavio, you will be responsible for:

- **Joule Skills Development & Configuration:** Support the creation and configuration of custom Joule skills for SAP Signavio integration, including defining skill parameters, input/output mappings, and action triggers that enable users to interact with process intelligence capabilities through the Joule interface
- **SAP Signavio Environment Setup & Connectivity:** Support the technical configuration of SAP Signavio environments to work with Joule, including API connectivity setup, authentication mechanisms, data access permissions, and ensuring proper communication channels between Joule and Signavio backend services

- Integration Testing & Quality Assurance: Support end-to-end testing of Joule skills within the SAP Signavio environment, validate data flows between systems, verify user interaction scenarios, and document integration issues while collaborating with development teams to resolve technical challenges
- Skills Handover Documentation & Knowledge Transfer: Create comprehensive documentation for Joule skills deployment, including technical specifications, configuration guides, troubleshooting procedures, and best practices to ensure smooth handover and maintenance of Joule-Signavio integration capabilities

What you bring

- Student (f/m/d) at a university or a university of applied sciences
- Preferred fields of study: Enrolment in a Bachelor's or Master's degree program in Artificial Intelligence, Software Development, Business Informatics, or a related field.
- Language skills: Proficiency in English
- Very good knowledge of software development, hands-on experience is a plus
- Python coding skills or willingness to learn it fast
- Motivated by working on the latest trends within the complex environment of a large corporation
- Collaborative and proactive approach to problem-solving in a team environment.
- Willingness to learn and adapt in a fast-paced, innovative environment.
- Required to work from the office (Berlin or Walldorf or Munich) at least 1 day a week.

Meet your team

Join the SAP Signavio Foundation & Intelligent Transformation Joule & Process AI team, a leading force in process transformation and product development for AI topics within Signavio. Our mission is to empower organizations with AI capabilities and respective development process guidance fostering and easing AI feature integration into Signavio solutions driving Business transformations.

In our team, you'll work closely with talented professionals dedicated to driving innovation and value through strategic development program management. Together, we work on crafting developing strategies, driving innovative poc's & AI development ensuring stakeholder satisfaction.

Your set of application documents should contain a cover letter, a resume in table form, school leaving certificates, certificate of enrollment, current university transcript of records, copies of any academic degrees already earned, and if available, references from former employers (including internships). Please also describe your experience and skills in foreign languages and computer programs / programming languages.

This is a SAP global, strategic, paid working student position that provides students with opportunities to find purpose in their careers.

Bring out your best

SAP innovations help more than four hundred thousand customers worldwide work together more efficiently and use business insight more effectively. Originally known for leadership in enterprise resource planning (ERP) software, SAP has evolved to become a market leader in end-to-end business application software and related services for database, analytics, intelligent technologies, and experience management. As a cloud company with two hundred million users and more than one hundred thousand employees worldwide, we are purpose-driven and future-focused, with a highly collaborative team ethic and commitment to personal development. Whether connecting global industries, people, or platforms, we help ensure every challenge gets the solution it deserves. At SAP, you can bring out your best.

We win with inclusion

SAP's culture of inclusion, focus on health and well-being, and flexible working models help ensure that everyone – regardless of background – feels included and can run at their best. At SAP, we believe we are made stronger by the unique capabilities and qualities that each person brings to our company, and we invest in our employees to inspire confidence and help everyone realize their full potential. We ultimately believe in unleashing all talent and creating a better world.

SAP is committed to the values of Equal Employment Opportunity and provides accessibility accommodations to applicants with physical and/or mental disabilities. If you are interested in applying for employment with SAP and are in need of accommodation or special assistance to navigate our website or to complete your application, please send an e-mail with your request to Recruiting Operations Team: Careers@sap.com.

For SAP employees: Only permanent roles are eligible for the [SAP Employee Referral Program](#), according to the eligibility rules set in the SAP Referral Policy. Specific conditions may apply for roles in Vocational Training.

AI Usage in the Recruitment Process

For information on the responsible use of AI in our recruitment process, please refer to our [Guidelines for Ethical Usage of AI in the Recruiting Process](#).

Please note that any violation of these guidelines may result in disqualification from the hiring process.
